Ahmed Ameen

Java Backend Developer

SUMMARY

Skilled Software Developer with over 2 years of experience in developing and maintaining **mission-critical**, high-performance, **enterprise-level**, production-grade, **microservice-based** web systems. Proven track record of writing *secure, error-free, clean*, and well-designed code. Hands-on experience in **refactoring**, server handling, and *mitigating offensive web attacks* and threats.

WORK EXPERIENCE

Cashcall, Cairo, Egypt

Digital Payment & Financial Solution Startup.

Senior Java Backend Developer 06/2023 - Present

PGW Team (B2B):

- Maintained and enhanced the **Payment Gateway (PGW)** system, integrating it with multiple banks and payment gateways to expand payment methods.
- Supported customers and merchants during **PGW integration**, resolving any technical issues and ensuring a smooth onboarding process.
- Ensured PGW compliance with "*Payment Card Industry Data Security Standard*" (**PCI DSS**) regulations, maintaining high reliability and security for transactions.
- Mentored and trained junior developers, contributing to team growth.
- Collaborated with the business team to plan and design new features aligned with objectives.

Junior Full-Stack Developer 08/2022 – 6/2023

Core System (B2M):

- Handling the **technical vendor-related requests** received from the Product Team, writing technical documents, adding features, fixing bugs, and supporting testing and deployment.
- Maintain **Java Spring Boot** application and develop *Scheduled Tasks* to make automated tasks in the system within a specific time.
- Collaborating with the Business/Technical operation teams in the planning to add new Features and deploy them to the Production Env.

Upwork & Mostaql, Freelance, online.
